Singapore • chiamingcat@gmail.com • (+65) 9712 1396

SUMMARY

Analytical business and technology professional with experience across market research, risk investigations, product strategy, and digital platform operations. Background spans AI-enabled products, fintech/payment workflows, marketplace platforms, fraud analysis, consulting research support, and user behaviour analysis. Skilled at gathering information, identifying patterns, structuring insights, and translating business, operational, user, and technology signals into recommendations for decision-making.

CORE STRENGTHS

Market Research • Business Analysis • Technology Analysis • Risk Intelligence • Competitive Analysis • Research Methodology • Root Cause Analysis • Data Interpretation • User Behaviour Analysis • Strategic Problem Solving • Stakeholder Management • Insight Synthesis

EXPERIENCE

Mintable & Mintology

Singapore, Mar 2022 – 2026

Product Owner / Scrum Master

Previously: User Growth Specialist, Community Manager cum QA, Community Manager

- Progressed from community management and QA into user growth, product operations, and product ownership across marketplace, AI, fintech, subscription, wallet, and payment initiatives.
- Analysed user feedback, QA findings, operational issues, stakeholder requirements, and platform behaviour to identify product problems, adoption barriers, and business priorities.
- Translated business, user, operational, and technical inputs into structured product requirements, acceptance criteria, delivery priorities, and stakeholder recommendations.
- Worked with business, operations, design, engineering, and QA teams to evaluate product opportunities, trade-offs, risks, and implementation constraints.
- Supported AI-powered search and AI-assisted copyright detection initiatives, improving marketplace discovery, platform trust, and operational efficiency.
- Improved feature adoption by 25% through onboarding improvements, user education, feedback analysis, and post-launch optimisation.
- Reduced average feature lead time from 4 weeks to 2.5 weeks and increased team throughput by 20% through prioritisation, planning, dependency tracking, and cross-functional coordination.

Accenture

Singapore, Dec 2020 – Feb 2022

Risk Operations Analyst

- Investigated approximately 700 fraud and scam cases daily while maintaining 95% accuracy and compliance standards.
- Analysed fraud patterns, risk signals, user behaviour, and operational issues to support platform integrity and process improvement.

- Identified recurring investigation trends and operational bottlenecks, contributing to root cause analysis and workflow improvements.
- Documented investigation procedures and regional risk trends to improve team consistency, training quality, and operational decision-making.

Bain & Company

Singapore, May 2020 – Oct 2020

Translator / Data Analyst / Literature Review Support

- Conducted literature reviews, translation, and data analysis support for consulting projects involving Cargill and KFC Vietnam.
- Gathered, reviewed, and structured business information to support consulting project teams.
- Built early exposure to consulting-style research, market context analysis, client problem solving, and business documentation.

KOSH Consulting Group

Singapore, Oct 2020 – Jan 2021

Analyst Intern

- Led the Vietnam Norming Project, attracting 150+ sign-ups in 3 days through targeted marketing and research design.
- Supported research planning, participant acquisition, data collection, and project coordination.
- Applied psychology research training to structure research activities and interpret user behaviour.

Student Coin

Singapore, Nov 2020 – Sep 2021

Community Relations Manager

- Managed 27 international communities for an early-stage crypto startup, increasing active participation by 40%.
- Supervised and trained 20 moderators while developing community guidelines, FAQs, and escalation workflows.
- Gathered user and community feedback to support product communication, trust-building, and engagement strategy.
